

**IMPROVED
PERFORMANCE &
SYNCING ACCURACY**

TimeCoder Pro 5.1 intelligently evaluates the court reporter's printed time stamps on the transcript, resulting in greater syncing accuracy over previous versions of TimeCoder Pro. Now there is no need to strip time stamps from transcripts prior to processing. In fact, users are encouraged to retain time stamps for greater syncing accuracy.

INCREASED SPEED

TimeCoder Pro's improved audio mining engine leverages today's newest hardware to perform synchronizations on average of 40x realtime when using an Intel® Core™2 Duo processor. That's twice as fast as previous versions running on a standard Pentium 4 processor! Processing speeds are increased by an average of 90% when using an Intel® Core™2 Quad processor.

**NEW ONLINE ACCOUNT
MANAGER**

The Account Manager – where you check job status and get additional sync credits – has been refined and enhanced. With an updated user interface, the new Account Manager provides the ability to review billing individually for each sync project and returned account credits. Users will also receive a more detailed notification when a sync project is ready. inData news is now displayed in the Account Manager, to keep clients up-to-date on the latest company announcements.

**PRODUCT
NOTIFICATIONS**

Two new features keep you current with TimeCoder Pro. An "Updates Now Available" dialog will appear at start up to let you know when product updates can be downloaded. Additionally, a Product Bulletin will alert you to TimeCoder Pro news, such as when scheduled server maintenance could impact your TimeCoder processing.

VISTA™ COMPATIBLE

TimeCoder Pro has verified compatibility with the new Microsoft Windows Vista™ operating system.

UPDATED DEPOVIEW®

DepoView, the embedded video player, has a completely new, updated interface. The new DepoView is more compatible with other trial management tools, including the ability to export true Summation .sbf files. The condensed transcript printing function has been re-ordered to provide more logical rendering. DepoView users also now have the option to send transcript text without video, when creating a new PowerPoint presentation.

ENHANCED SUMMATION SUPPORT

TimeCoder now produces true Summation .sbf files. Exports to Summation .sbf format now include exhibit hyperlinks and also the exhibits themselves in the .sbf.

EASY CONVERSION OF EVALUATION SOFTWARE

inData makes it easy to try TimeCoder Pro before you buy it – just download an evaluation copy. If you like the product, you can easily convert the evaluation copy to a full working version from the Help menu within the program.

IMPROVED HELP FILE

TimeCoder Pro's Help file has been improved too. Help content has been updated, and you can now save your favorite Help topics for quick reference.

About inData

inData is a technology company specializing in the management and presentation of information. For legal professionals dealing with the challenges of litigation, inData develops innovative software products and provides personalized eDiscovery and trial consulting services.
