

Multiple Syncing Options:

- › **RapidSync®** - Synchronizes your transcript and video on average 20 times faster than real-time! The RapidSync engine uses the latest in audio mining, speech recognition, language modeling, and transcript format detection technologies to take the labor out of a once tedious task.
- › **Send to inData** - Too busy or have a large job requiring quick turnaround? Upload your materials to inData and our experienced technicians will quickly synchronize and Q/C your transcript for you with a 100% satisfaction guarantee! In just a short time, your deposition will be delivered to you ready to be branded with your company information and distributed to your clients.
- › **AutoSync™** - Synchronizes your transcript and video on average 2-3 times faster than real-time.
- › **Manual Synchronization** - Manually timestamp deposition transcript to associated deposition video.

DepoView® DVD - NEW!! Give your clients the ability to review their video transcripts on a standard DVD player or personal computer with DepoView DVD. One DepoView DVD disc can store an entire full day's deposition. Plus, DepoView DVD supports your choice of MPEG-1 or MPEG-2/VOB files. It even includes an MPEG-2 codec, so you can rest assured your clients will have a good user-experience playing the video on a PC. You can even brand the DepoView DVD main menu with your company logo and contact information. Each DepoView DVD includes a complimentary license of DepoView software for video clip creation that a user can download at their convenience.

Exhibit Linking - Add electronic exhibits to your Digital Video Transcript and TimeCoder Pro will automatically find references to the exhibit within the transcript and create links. When your clients view the transcript in DepoView, they can easily review the linked exhibits by clicking on the icons that appear wherever an exhibit is mentioned.

Encoding, Syncing, Authoring, and Burning to DVD - NEW!! Encode and sync files from AVI/DV without any extra pre-treatment steps, and export your synced work product to DepoView DVD. In essence, TimeCoder Pro acts as your encoder, eliminating the need to purchase additional, expensive encoder hardware.

Online Account Manager - Monitor the status of your syncing projects at any time with your personal Online Account Manager. View the amount billed for specific syncing projects, review accuracy and time statistics, conveniently access support, fund your account when needed, and more...

The RapidSync and AutoSync features of TimeCoder Pro 5.2 also include:

- › **Batch Processing** - Queue two or more transcripts for automatic synchronization, and enjoy your weekend! Come Monday morning, your transcripts will be timestamped and ready to Q/C.
- › **Private Account Management** - Monitor TimeCoder Pro's progress remotely, in realtime, along with a complete history of jobs processed, including time and accuracy* performance statistics. You can also view the progress of jobs sent to inData.
- › **Quality Control Mode** - Quickly check the quality of auto-generated timecodes with TimeCoder Pro's user-friendly quality control interface. Transcript lines that need to be checked are clearly marked, and a comprehensive set of keyboard commands lets you review and make changes with ease.

Unlimited TimeCoder Pro Installations - Install on as many systems as you require (per site location).

Intuitive User Interface - Because TimeCoder Pro uses a comprehensive set of keyboard commands, common tasks are made simple, and users can become familiar with the use of the product in a short period of time.

Speech-matched Lines - **UPDATED!!** Provides more accurate timecodes, which greatly reduce 'trimming and tweaking' during pre-trial deposition clip creation. Now, short-answer accuracy (e.g. Yes, No) is greater than ever before.

Single-click Quality Control - Performs final check for proper timecode sequences and media file order.

DVT Status - Keep your Digital Video Transcripts organized and let users know at a glance which DVTs need to be synchronized, which need Q/C, and which are ready for export.

Expanded Import and Export - Easily handles most popular video deposition formats. See below for a complete list of supported products and file types.

Timecode Preservation - Save existing timecodes in a transcript when creating a new Digital Video Transcript.

Find Feature - Quickly find timecodes, text phrases, and page/line numbers within a Digital Video Transcript.

Timecode Extrapolation - Easily populate missing timecodes within small sections of digital video transcripts that do not contain existing timecodes.

Timecode Adjustments - Adjust existing timecodes to correct slight delays.

Transcript Formatting Tools - Apply page/line numbers and/or word wrap to raw transcripts for proper format.

Free Tutorials NEW!! - Learn TimeCoder Pro software in just 18 minutes with our comprehensive series of tutorials.

TimeCoder Pro Marketing Program NEW!! - Take advantage of inData's customizable brochures and mailers available exclusively to TimeCoder Pro clients.

Programs/File Types Supported by TimeCoder Pro 5.2 Import Files
