

WHAT'S NEW IN TIMECODER PRO V5.2

MPEG-2 AND DVD-VIDEO (VOB) SUPPORT

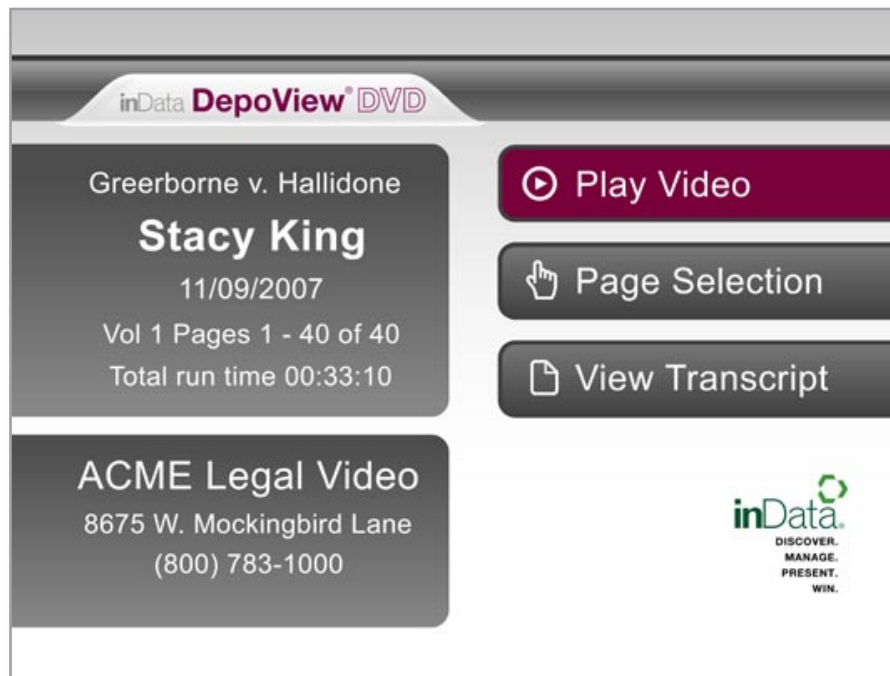

Your videos have never looked better... TimeCoder® Pro now supports the higher resolution MPEG-2 and VOB file formats. It comes with a codec for syncing these files right out of the box.

ENCODING AND SYNCING FROM DV

Save time and money when you record video depositions directly to AVI/DV. Now you can encode and sync files without any extra pre-treatment steps, eliminating hours of time from your workflow! Export your synced work product to DVD. In essence, TimeCoder Pro acts as your encoder, eliminating the need to purchase additional, expensive encoder hardware.

DVD AUTHORIZING AND BURNING

TimeCoder Pro v5.2 now allows you to author and burn DVDs from within the program directly to inData's new DepoView® DVD. DepoView DVD is a hybrid DVD/software tool for viewing video depositions (patent-pending).

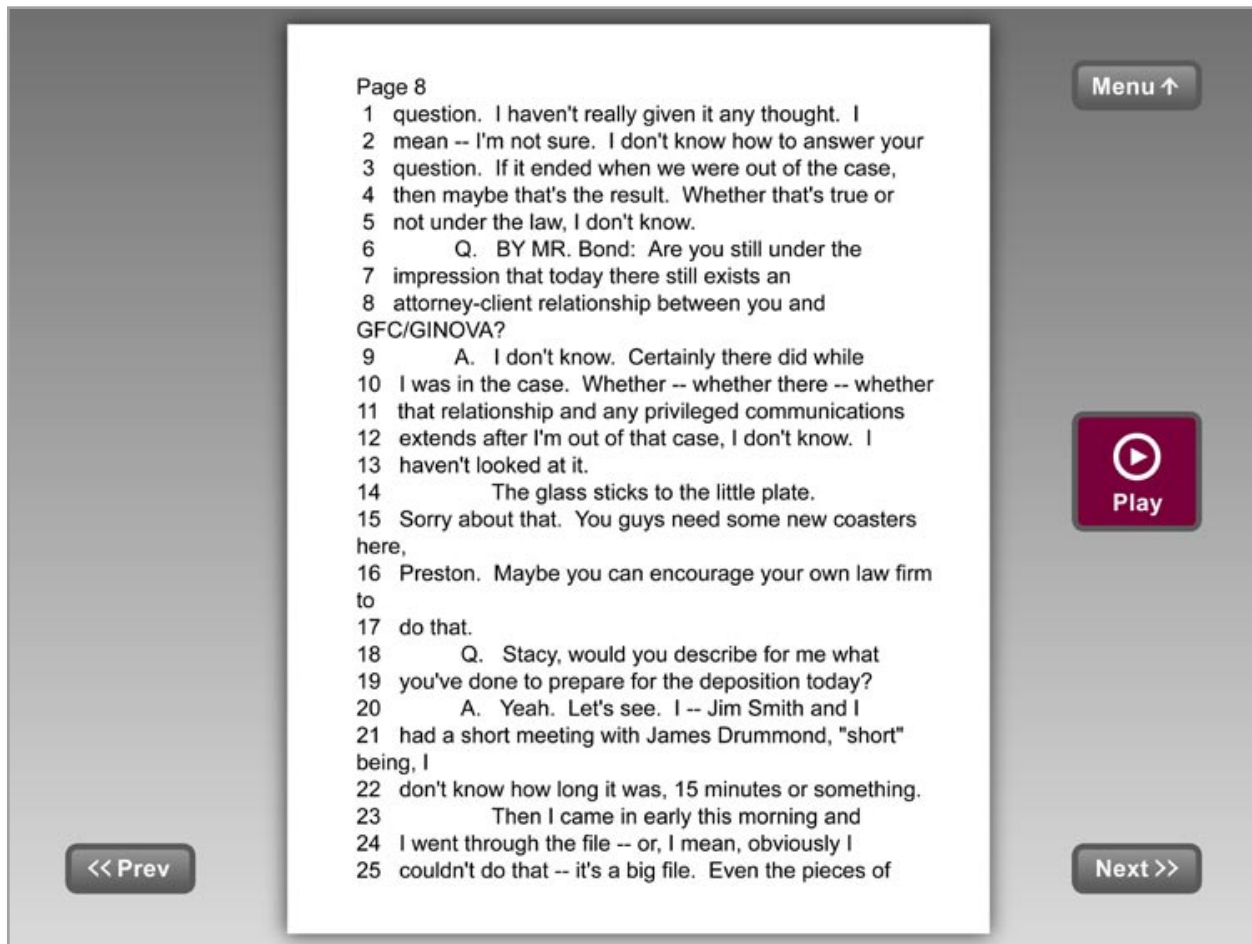

DepoView DVD Menu

Give your clients the ability to review their video transcripts on a standard DVD player or computer. DepoView DVD is the only product available that enables your clients to review entire transcripts in addition to deposition video footage on DVD. When you export to DepoView DVD, you can:

- › Export your choice of MPEG-1 or MPEG-2/VOB files
- › Brand DepoView DVD with your company contact information and logo to further market your services
- › Put an entire day's deposition on one disc, and more...

DepoView DVD also includes a proper codec for reading MPEG-2 and VOB files, so you can rest assured your clients will have a good user experience with your video work product. In addition, it includes standard load files for inData TrialDirector®, CT Summation®, LiveNote®, and more...

DepoView DVD View Transcript

MAC SUPPORT

Good news for all of the Mac® lovers out there: TimeCoder Pro v5.2 has been tested and verified to work on Apple® computers running the Microsoft Windows operating system in the Boot Camp®, Parallels™, and VMware Fusion™ environments.

ADDITIONAL AUDIO PROCESSING

Now when you use RapidSync®, you can enable additional audio processing to reduce the time you spend afterward performing quality control. You'll notice a significant decrease in the number of questionable (i.e. yellow) lines in your transcript.

SHORT ANSWER ACCURACY

TimeCoder Pro v5.2 has been enhanced to synchronize short answers in a deposition (e.g. Yes, No) with greater accuracy than ever before.

FREE TUTORIALS

Learn TimeCoder Pro software in just 18 minutes, with our new comprehensive tutorials. When you launch TimeCoder Pro software, you will now see a "Getting Started" dialog with several tutorials to choose from. Each tutorial is only 2-6 minutes in length, allowing you to learn topics of importance to you, at a time convenient to you. Additional tutorials are also available on inData's Web site.

TIMECODER PRO MARKETING PROGRAM

Are you looking for better ways to market your video services? inData now offers customizable brochures and mailers exclusively to TimeCoder Pro clients. Add your logo, contact information, special promotions, information about your company, and more to customizable, professionally designed templates. The only cost to you is the cost of materials and postage, paid directly to a third-party printer/mailhouse. Details may be found in the TimeCoder Pro Online Account Manager under Support.

NEW IN DEPOVIEW

SUPPORTS MPEG-2 AND VOB FILES

The newest version of inData DepoView software supports MPEG-2 and VOB files. When you give your clients DepoView DVDs, they can still download DepoView software to create video clips, search through transcripts, and complete other tasks best done in a software application.
