

INDATA COMMITTED TO WINDOWS VISTA™ SUPPORT

On January 30, 2007, Microsoft released Windows Vista™, the highly anticipated new version of its operating system. Continuing our support of Microsoft technologies, inData Corporation has released TrialDirector® Version 5.1, TimeCoder® Pro Version 5.1, and DepoView® Version 5.1, all of which are fully compatible with the Vista platform.

Older versions of inData software products generally will run on Windows Vista if already pre-installed on a computer being upgraded to the Vista operating system. However, because Vista wasn't yet released when we developed these products, we cannot fully guarantee their performance on the Vista operating system.

If you have any questions or issues regarding your inData software running on Windows Vista, please call our Technical Support department at 480-497-0066 or e-mail us at support@indatacorp.com.

About inData

inData is a technology company specializing in the management and presentation of information. For legal professionals dealing with the challenges of litigation, inData develops innovative software products and provides personalized eDiscovery and trial consulting services.
